

THE SALES PLAYBOOK

Selling with the Hub

Put current market evidence in front of the client at the three moments that decide the deal: winning the listing, setting the price, and placing the buyer.

01 · WIN THE LISTING

Win the mandate on expertise

SITUATION	You are pitching an owner for the listing, ideally an exclusive. They are deciding whether you know their market better than a bigger-name competitor.
IN THE HUB	A JethQ-branded market report for their make and model: what is on the market now, what recently sold and at what price, and the average time to sell.
RESULT	You walk in with the whole market on one page and win the mandate on demonstrated expertise, not promises.

02 · SET THE PRICE

Set a price you can defend

SITUATION	The owner wants a number you can both stand behind, and will push back if it feels low.
IN THE HUB	Comparable asking and sold prices, how long similar aircraft are taking to sell, and a valuation report you can leave with them.
RESULT	You set a realistic asking price and back it with evidence when the owner or a buyer pushes.

03 · PLACE THE BUYER

Place the buyer faster

SITUATION	An acquisition client wants the right aircraft at the right price, and proof you have looked across the whole market.
IN THE HUB	A side-by-side shortlist with photos, pedigree, damage history and status, built in minutes instead of an afternoon.
RESULT	You hand the buyer a considered shortlist sooner, and spend the hours you saved selling.

WHY YOU CAN STAND BEHIND IT

~90,000

aircraft tracked across 184 markets and 170+ models

Daily

updated automatically, audited every night

One

record for data, intel, history, photos and valuations

Minutes

to a client-ready report or valuation

The Hub supports your judgment and relationships. It does not replace them. It puts the market evidence in your hands at the moment a client decision is made.
